Wednesday, Nov 27, 7:30 p.m. -> meeting in-person at Chalet	CHRISTMAS PARTY AND WORKSHOP (<i>Members only</i>)

Spring Plant Sale / Fall Exchange

PLANT PREPARATION GUIDELINES

How to participate: Simply pot up any extra perennial divisions, plants, seedlings or cuttings, in a correctly sized pot. Your donations will look their best if you're able to pot them up a week or two ahead of the sale, this allows them a bit of time to recover from any transplant shock. Keep them well watered and stored in a shady spot if possible.

We accept: Healthy annuals or perennials / fruit or vegetable seedlings.

Please remember to **LABEL** your treasures so buyers can choose wisely.

Include such details on the tag as: plant name, flower colour, height, light & moisture requirements. Right plant in the right place = success!

IF you need labelling help, experienced club members will be on hand to give you a hand — trusty felt pens at the ready. Don't be shy to ask!

What to avoid: sad looking, droopy plants. Please donate only the sort of plants you would buy. They should be a credit to both you as a gardener and us as a horticultural club.

Best of all, now that you've made space in your garden by generously donating your extra plants to help the club, you can buy **MORE** plants! How can you resist these great deals? You can't. Besides, don't forget you have all those fresh empty spots that need filling . . .

IMPORTANT : The spring plant sale is our *only* fundraiser. The proceeds from it, along with membership fees, help fill our coffers so we can hire more fantastic guest speakers and offer workshops!
